The Time Line Therapy® Association

“Change the Future”

Time Line Therapy® Process

There is an ancient tradition in this world that says there is a relationship between the consciousness of the people on the planet and the consciousness of the planet – and modern physics agrees. We are part of this planet and the planet is part of us. The sum total of the individual consciousness makes up the planetary consciousness. That means that what’s in your time line, and what’s in the time line of the individuals in the world can determine what’s in the time line of the world – that is to say that the sum total of all our time lines makes up the time line of the world.

**Think of what that means. If we change our future time line (and enough people do it),
then we can change the future of the world!**

**But did you notice that things in the world aren't necessarily going in a positive
direction?**

**That is because nobody is doing anything about it. People are confused, unclear,
afraid, paralyzed, frozen and just waiting for something to be done by someone else.
There are things which we call "external reality" that you need to be aware of and do
something about – and when what is happening is not working well, something must
change. Most of us are not at the leadership level in the world, but by focusing our
energy and changing our consciousness we can affect change. This is not immediately
obvious. There is something all of us can do right now – and it does not take a long
time or a great effort.**

**We need to take action, now – we must change the world time line as quickly as
possible by changing our future time lines, so we all can have a say in what awaits us
in the future. This is a period of transition, and how the transition goes determines**

how your future will be. Please send this to all your friends and ask them to do it too – put this in your future time line. Do it now. Here below it's how to do it.

Tad James Ph.D. and Adriana James Ph.D.

Change Your Time Line, Life and World.

The Process

Here's how to change the world time line:

Imagine it is 10 years from today, in the year 2031.

It is now 10 years from now _____, 2031, and we (you and us) have lived a healthy, comfortable and prosperous life. In the last 10 years we have eaten good, wholesome, healthy foods, and our health is very good. The environment is getting cleaned up in a way that is good for all living things. We have worked in environments which ensure success and good and positive results for ourselves and for the communities we live in. Our lives are transformed in the most positive and happy way.

Our freedoms have reached new levels and for the first time in history we connected with our true self-worth as human beings. Although there was a short time where it looked as though the world went through a period of massive chaotic stress, people's consciousness woke up and became aware of what we needed to do, to change the situation. More and more people have awakened to the reality of facts and human creativity and freedom has succeeded.

Wars are over. We now respect and appreciate each other with true human love and compassion. There is room for all of us to express our creativity with dignity and in liberty. We have now the freedom to live where in the world we prefer and allow our spirit to fly high. We are now aware and conscious of all human suffering and found

**true solutions to solve the real and hidden (for the moment) problems – that plague
humanity.**

**In the last 10 years there have been no wars in the country where we live, and we are
on the way to true and real world peace. Prosperity abounds.**

**New technologies have been revealed that freed us from fossil or nuclear energy
dependence, and they are now available or will be within a year or so.**

**Now all people – not just white, or black, not Asian or European, not young or old, all
people, not women or men, not Arctic or African, but ALL PEOPLE ARE FREE. Free to
pursue their life goals and dreams. Free as never before. What a great 10 years it has
been!**

Now you need to put it in your future

Here's how:

Your future time line stretches out from you like a road going away from you toward the future. Imagine floating or flying above that road, and let your Unconscious Mind take you out to 10 years, it knows where 2023 is. Trust it, and put the picture you just imagined in your future. Put it there in your future. Do it every day as long as the world is not the way you want it. Do it again, now.

WARNING: Do NOT attempt to do this process with other people! This is for your own use only! Time Line Therapy® is a very powerful process with guaranteed results IF performed by a trained practitioner. If you are interested in learning how to do it with your family members or other people in a NLP or coaching setting, please contact our office for further training.
